

How to Use ColorVeil at Home

ColorVeil is a software program that allows you to put a digital coloured overlay over your screen.

You can download colorveil at home for free from:

<https://www.aurelitec.com/colorveil/windows/download/>

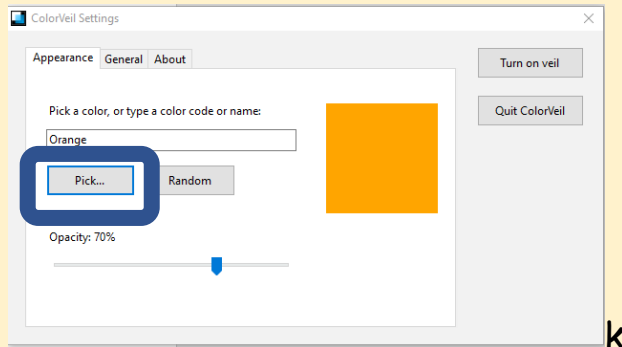

1. Once you have installed it find ColorVeil under C in your programs list
2. When you first open ColorVeil your screen will go yellow and this box will appear. Cross the box off using the X in the top right corner:

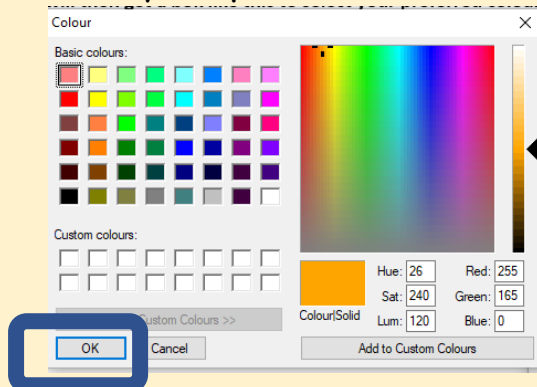

3. In the bottom right corner of your screen there will be an arrow pointing up. Click this and then right click the ColorVeil icon:

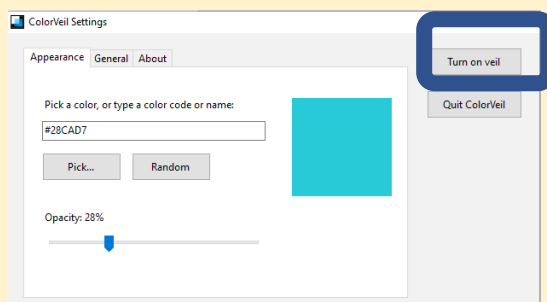

4. You will then get a box like the one below. To select your preferred colour (if it isn't yellow) click pick

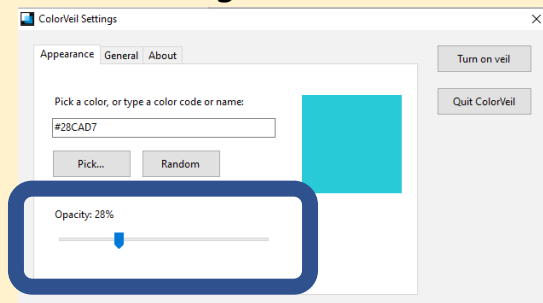

5. Click your preferred colour and then click ok

6. Click turn on veil

7. If it is too light or dark use the opacity slider to adjust it

8. Once you are happy with the veil click the cross in the top right corner of the ColorVeil box
